

See what others have saved ...

A small facilities management company ran 24 cars and 13 vans on contract hire. Total Motion switched the vehicle funding and management to a specially designed Prism package.

Saving: £28,000 per year

A national company had 180 vehicles on contract hire and 20 through outright purchase. Total Motion helped reduce the fleet to 30 by designing and implementing a cash opt out scheme.

Saving: £120,000 per year

A national construction services company was running 80 cars and 270 commercial vehicles. Total Motion designed and implemented a new flexible fleet policy to suit the fluctuations of the business and improve the maintenance service. Up to 30% of the fleet can now be returned at any time.

Saving: £200,000 per year

A global plc was running 3,000 cars, vans and HGVs in the UK. Total Motion reworked the whole fleet policy, moving the cars and vans to Prism with shared profit maintenance and introducing sale and leaseback with pay on use maintenance for the lorries. We also advised on fuel management, insurance and a cash for car scheme.

Saving: £228,000 in the first year

Total Motion is an independent vehicle management company that provides businesses and organisations with complete, bespoke solutions for financing, maintaining and managing company and private cars or vans.

We are not a car dealer, contract hire company or finance broker but true fleet management specialists with over 25 years' experience. We work with clients on an individual basis to find you the most cost effective, efficient and hassle-free method of meeting your business's fleet requirements.

We manage fleets from 15 to in excess of 1,000 vehicles for organisations all over the UK and into Europe, providing a range of services including:

- > Vehicle Funding
- > Fleet Management
- > Maintenance Management
- > Accident Management
- > Vehicle Monitoring
- > Licence Checking
- > Health & Safety Policies
- > Duty of Care Compliance
- > Flexible Leasing & Daily Rental

Could we cut your fleet costs by £1,000 per vehicle?

Could we cut your fleet costs by **£1,000 per vehicle?**

If you're running a fleet of more than 15 vehicles, we guarantee that we could cut your costs.

That's because Total Motion has a different approach to fleet management. We provide complete and bespoke solutions for every individual client, covering not only funding and maintenance but also:

- Vehicle policy, strategy & planning
- Health & safety, duty of care & risk management
- Fleet administration
- Driver support
- Driver development
- Employee benefits & cash for car schemes
- Fuel management
- Vehicle tracking & communications

Why not find out? ...

To prove how much you could save, we're offering you a **free, no obligation** fleet analysis. We'll undertake a full assessment of how your fleet is structured and operated, and provide comprehensive recommendations for cost, resource and management improvements.

Our Solutions

Whether you choose our total fleet management package or just one of our modules, all of our solutions will be individually tailored to your needs.

PRISM VEHICLE MANAGEMENT

Our total fleet management solution provides you with a team of dedicated fleet professionals who will work alongside your own staff or take complete responsibility for managing every aspect of your fleet. Prism combines the best attributes of the mainstream finance options with an all-encompassing maintenance and management package, backed by ongoing support and advice - yet it also offers considerable savings compared to other funding options.

FLEET MANAGEMENT & ADMINISTRATION

The resources needed to manage a fleet effectively can be very expensive. Total Motion can take responsibility for your fleet administration and driver support functions, reducing your costs while ensuring your interests are properly protected.

MAINTENANCE

Maintenance is one of the highest fleet costs, and one of the most difficult to control and forecast. Total Motion has developed a number of maintenance modules to reduce spend, minimise downtime and raise quality standards. If you're running more than five cars or vans, we'll offer Shared Profit Maintenance, giving you fixed costs and refunds on any surplus.

FLEXIBLE LEASING

If you need a vehicle for a day or on a twelve month contract, Total Motion guarantees supply around the UK at the most competitive rates and the highest level of service. With access to over 300,000 vehicles at 600 locations across the UK, we can offer delivery around the clock in as little as two hours.

FUEL MANAGEMENT

Over just three years, fuel can cost as much as the vehicle itself. Total Motion will analyse your volumes, locations, types of fuel and purchase patterns to help you reduce the costs and manage the process.

VEHICLE MONITORING

Our team of industry-qualified engineers can conduct on-site appraisals of all company vehicles and private cars driven on company business, ensuring they are safe, legal and roadworthy. As well as ensuring you comply with your duty of care responsibilities, Vehicle Monitoring will cut your maintenance costs, repair bills and insurance premiums - and reduce the risk of fines.

LICENCE CHECKING

Total Motion is authorised by the DVLA to conduct licence checks on a client's behalf. We check direct with the DVLA computer - eliminating the risk of fraudulent or stolen licences - and issue a simple report identifying any problems. Prices start at just £6.50 per licence, significantly reducing the time and cost of handling the task yourself.

CASH FOR CAR SCHEMES

If you are considering offering your employees a cash for car scheme, Total Motion can offer accurate and objective advice on devising and implementing effective and efficient programmes.
